ACADEMIC TRAINING

2006-2012	Postdoctoral Research Associate	Harvard University
2001-2006	Ph.D. in Physical Chemistry	Peking University
1997-2001	B.S. in Chemistry	Peking University

PROFESSIONAL EXPERIENCE

2019-present	Associate Professor, Honors Faculty	Arizona State University
2013-2019	Assistant Professor, Honors Faculty	Arizona State University

ACADEMIC AND PROFESSIONAL AWARDS

Award for Progress of Science and Technology, Third Prize, Beijing, China (2008), Natural Science Award, First Prize, Ministry of Education, China (2007), Outstanding Graduate Research Award, CCME, Peking University (2006), Samsung Fellowship Award, Peking University (2005), Bao Gang Fellowship Award, Peking University (2001), Guanghua Fellowship Award, Peking University (2000), Chuying Fellowship Award, Peking University (1998), Wusi Fellowship Award, Peking University (1997-1999)

RESEARCH INTERESTS

My main research interest lies in the interdisciplinary area of nanoscience and biology/biophysics. I focus on rational synthesis and assembly of low-dimensional materials into functional devices, and innovations of bio-probes based on nanoscale building blocks to bridge artificial electronics with biological systems at molecular and cellular levels.

Specifically, ongoing research projects include:

- Chemical vapor deposition of Si nanowires and 1D Si/Ge heterostructures
- Nanoscale field-effect transistors based on 1D semiconductive nanomaterials
- Label-free protein/DNA/RNA sensing in physiological environments
- Gated solid-state nanopore sensors embedded within metal nanoelectrode pairs for single-molecule level DNA mapping and sequencing
- Spatiotemporally modulated electric field tuning the intra-/inter-cellular signaling pathways to study the coupling of the biochemical, electrical and mechanical (BEM) networks
- Implantable ultra-small bio-probes for interfacing with functional cell circuitries, creating hybrid structures of nanoscale electronics and living cell networks/tissues for bidirectional communication and biomimetic information processing

GRANTS & FUNDING

Ongoing Research Support

MURI Z8165001 Losert (PI) 04/01/2016-03/31/2019, \$4,497K total, \$1,050K for my group.
 Extension of support for another two years approved in 2019, \$700K for my group 04/01/2019-03/31/2021
 DOD / AFSOR
 Understanding and Controlling the Coupled Electrical, Chemical, & Mechanical Excitable Networks of Living Systems

Peer-reviewed papers (original work)

Symbols: * Corresponding author, # Equal contribution, underscored name: from Qing group

Authors are listed in published order representing their contribution to the work from high to low (unless explicitly labeled as equal contribution) with the senior/corresponding authors listed last. Some journals, for example, *Nature* and its sister journals, and *PNAS* note explicitly the contribution of authors in a special section at the end of the paper.
